SKILLS

Software Dev & AI

C/C++ | C# | Java | Python | Machine Learning

Game Dev & Tools

Unreal | Unity | Godot | VR | Git

Web & Data

Next.js | Node.js | PHP | SQL / MySQL

SOFT SKILLS

Problem Solving
Teamwork & Comms
Analytical Skills
Efficiency (Game Jams)

INTERESTS

Game Design | Sports | RPGs

ALEXANDRE HONORÉ

SOFTWARE ENGINEER | GAME DEVELOPER

Seeking a 22-week final-year internship (Starting September 2026).
Dual-degree student (Software Engineering in France and Video Game Development in Canada), specializing in the design of robust systems and optimized game mechanics.

PROFESSIONAL EXPERIENCE

Software & Automation Developer (Internship) — April - Aug 2024

KOESIO MANAGED SERVICES | France

- Developed RPA automation scripts, boosting productivity by >500 hours/ month.
- Deployed internal C#/Python tools to optimize operational workflows.

KEY PROJECTS

Project Teapot (3D/2D Co-op Puzzle) — Itch.io

Core & Network Developer

- Real-time orthographic projection of 3D objects to 2D with dynamic collisions.
- Client-server (P2P) network architecture via Steam API (synchronization and matchmaking).

Le Nectar des Étoiles (Game Jam) — itch.io

Gameplay Developer / Project Manager | Feb 2026

- **1st place Winter Wonder Jam** (UQAC/Ubisoft). Functional prototype developed in 48h.

It-takes-I0 (Co-op Platformer) — GitHub

C++ / SFML Developer | 2025

- Custom 2D engine built *from scratch*: collision physics and puzzle resolution based on electronic logic gates.

Cellular Automata (Generic Engine) — GitHub

Java / MVC Developer

- Designed an engine interpreting JSON files to generate custom automata.
- MVC architecture (JavaFX) integrating stochastic logic and dynamic neighborhoods.

EDUCATION

Master's in Computer Science (Video Games) — 2025 - 2026

University of Quebec at Chicoutimi (UQAC) | Canada

Master's Degree in Software Engineering (Diplôme d'Ingénieur) — 2021 - 2026

POLYTECH Lyon | France
