ALEXANDRE HONORÉ

SOFTWARE ENGINEER | GAME DEVELOPER

Seeking a 22-week final-year internship (Starting September 2026).
Dual-degree student (Software Engineering in France and Video Game Development in Canada), specializing in the design of robust systems and optimized game mechanics.

PROFESSIONAL EXPERIENCE

Software & Automation Developer (Internship) Aug 2024 - Jan 2025
KOESIO MANAGED SERVICES | France

- Developed RPA automation scripts, boosting productivity by >500 hours/month.
- Deployed internal C#/Python tools to optimize operational workflows.

KEY PROJECTS

Project Teapot (3D/2D Co-op Puzzle) Itch.io
Core & Network Developer

- Real-time orthographic projection of 3D objects to 2D with dynamic collisions.
- Client-server network architecture via Steam API.

Le Nectar des Étoiles (Game Jam) itch.io
Gameplay Developer / Project Manager | Feb 2026

- 1st place Winter Wonder Jam (UQAC/Ubisoft). Functional prototype developed in 48h.

It-takes-I0 (Co-op Platformer) GitHub
C++ / SFML Developer | 2025

- Custom 2D engine built from scratch: collision physics and puzzle resolution based on electronic logic gates.

Cellular Automata (Generic Engine) GitHub
Java / MVC Developer

- Designed an engine interpreting JSON files to generate custom automata.
- MVC architecture (JavaFX) integrating stochastic logic and dynamic neighborhoods.

EDUCATION

Master's in Computer Science (Video Games) 2025 - 2026
University of Quebec at Chicoutimi (UQAC) | Canada

Master's Degree in Software Engineering (Diplôme d'Ingénieur) 2021 - 2026
POLYTECH Lyon | France
